1 | Introduction

The Institutional research and planning is an ongoing process integrating assessment, systematic data gathering, analyzing and interpreting the data in order to improve the quality of academic programs as well as to enhance the performance of various units and operations supporting the academic programs. To achieve these objectives USTF had established the Office of Institutional Planning and Effectiveness (OIPE) and the Director of the office reports to the Chancellor. The OIPE is responsible for promoting the culture of assessment, evaluation, research-based planning and continuous improvement for all academic and non-academic units of the University. It supports academic and strategic planning; coordinates and leads institutional program and unit-based assessment; collects and maintains databases of USTF institutional data for research and administers assessment and evaluation support for academic and non-academic units in the University. The OIPE is the source for all demographic and statistical data for external reporting.

The OIPE has developed and maintained a Quality Assurance Manual that provides guidance to academic, administrative and support units for enhancing and improving assessment processes within the context of continuous quality improvement. The manual seeks to explain assessment in the context of institutional effectiveness that results in continuous quality improvement, by providing all necessary templates/forms required to periodically assess outcomes of these units and use the results to make necessary changes for continuous improvement in the academic and administrative units. The ultimate goal is to measure the level of achievement of the missions, objectives and outcomes of the academic programs, colleges and hence the University in order to establish plans for remedial actions as well as encouraging and adopting best practices in teaching and learning, research and service.

2 | USTF Institutional Effectiveness and Assessment Plan

The process of Institutional Effectiveness demonstrates how well an institution succeeds in achieving its objectives, goals, and mission. The mission statement, goals and objectives of all academics, administrative and support units are derived from the university mission statement, goals and objectives. The program effectiveness and learning outcomes and the objectives of the administrative and support units are assessed to determine the extent to which they are achieved in an academic year. The assessment results obtained are used as the bases for making changes for continuous improvements using assessment results for closing the loop across all academic and non-academic units in the University.

2.1 USTF Vision

University of Science and Technology of Fujairah (USTF) aims to be a proactive university in creating and integrating cutting-edge learning, impactful research, and effective community engagement to serve the people of the UAE and beyond.

2.2 USTF Mission

University of Science and Technology of Fujairah (USTF) is a multicultural university offering a wide range of academic programs that satisfy the needs of students, alumni, labor market and the community. USTF formulates and implements a research strategy to strengthen its recognition and profile and to enhance research impact on society. USTF develops graduates with creative minds, high level of professional skills and social responsibility to contribute to the sustainable development of the UAE, the region and the world.

2.3 USTF Core Values

- **Excellence**: USTF upholds the highest standards to achieve academic excellence in teaching, learning and research.
- **Integrity**: USTF demonstrates honesty, trustworthiness, reliability, transparency and accountability in all interaction with individuals and groups.
- **Respect and Tolerance**: USTF practices equity and fairness by listening to understand and support shared governance, inclusion and diversity.
- **Collaboration**: USTF is committed to reciprocal relationships developed through consultation to build strong ties with communities.
- **Innovation**: USTF supports creative activities and initiatives to find unconventional solutions for the greatest benefit of mankind.
- **Social Responsibility and Happiness**: USTF promotes community engagement, sustainability, and positivity to satisfy the needs and well-being of the community.

2.4 USTF Goals

1. Promoting excellence of education in an inspiring environment of teaching and learning.
2. Performing high quality, applicable and impactful research and intellectual contribution.
3. Recruiting qualified diverse students, enriching their experiences and serving their various needs in a student-centered environment.
4. Building reciprocal relationships and long-lasting ties with external communities.
5. Achieving operational excellence in university services.

2.5 Review and Update of Vision, Mission and Goals

University of Science and Technology of Fujairah's vision, mission, and strategic plan are approved by the Board of Trustees (BOT) and are reviewed every five years in the context of continuous improvement based on regular assessment and evaluation. However, opportunities or external factors might prompt the review to be conducted at an earlier stage. For reviewing the mission, vision, and strategic plan, the Chancellor shall appoint an ad-hoc or standing committee of the University to assist in leading the review. The ad-hoc or standing committee shall receive and review the chancellor's guidelines and prepare a draft based on extensive meetings and focus groups with all stakeholders of the University including alumni, employers, partners, parents, faculty, staff and students. Once the draft is finalized and approved by the Chancellor, it will be submitted to the BOT for its approval.

2.6 OIPE Mission

The Office of Institutional Planning and Effectiveness (OIPE) shall collect, analyze, and disseminate authentic institutional data. It shall support the university management in making evidence-based decisions, effective planning, and efficient utilization of resources. The Office is responsible for providing leadership in developing and overseeing assessment and evaluation processes to enhance the effectiveness of academic programs, support services, and administrative operations. The OIPE shall continually enhance the quality of institutional documents and assist colleges in the accreditation of their academic programs.

2.7 OIPE Vision

The OIPE shall establish a world-class system of assessment, continuous improvement, and evidence-based planning and budgeting at USTF, making significant contribution towards achieving the mission of the University.

2.8 OIPE Goals

1. Collect, organize, and disseminate authentic institutional data.
2. Analyze institutional data, prepare effectiveness reports, and suggest actions to achieve the strategic goals.
3. Establish and promote university-wide assessment and continuous improvement processes and monitor their implementation.
4. Improve the quality of institutional documents and their compliance with the Commission for Academic Accreditation (CAA) *Standards.*
5. Facilitate and promote submission of quality documents to the CAA for initial accreditation, re-accreditation, renewal of University licensure, and response reports.
6. Support the university higher management in strategic planning and decision and policy making.

2.9 OIPE Objectives

1. Improve the process of collecting, organizing, and disseminating institutional data to become the sole provider of reliable and authentic institutional data.
2. Prepare effectiveness reports based on the analysis of institutional data and suggest actions to help achieve the strategic goals.
3. Establish a culture of evidence-based assessment, evaluation, and continuous improvement for all academic and non-academic units in the University.
4. Revise and update thoroughly university documents to make them consistent and compliant with CAA *Standards.*
5. Improve substantially the quality of documents prepared for initial accreditation and re-accreditation, as well as response reports submitted to the CAA.
6. Assist in improving the QS ranking of USTF.
7. Organize assessment workshops for both academic and non-academic units in order to enhance the understanding of new processes for continuous quality improvement and closing the loop.
8. Make evidence-based recommendations to the university higher management, deans, and line managers for continuous quality enhancement.

2.10 Mapping the Alignment of OIPE Goals to USTF Goals

Table 2.1. Mapping the Alignment of OIPE Goals to USTF Goals

USTF Strategic Goals	OIPE Goals					
	1	2	3	4	5	6
Strategic Goal 1	√	√	√	√		
Strategic Goal 2	√	√				
Strategic Goal 3		√	√	√	√	√
Strategic Goal 4				√		√
Strategic Goal 5					√	√

The ultimate responsibility of the strategic planning and direction settings rests with the Chancellor. USTF has classified its 5-year strategic plan 2018-2023 into 5 strategic goals as mentioned above. Within the context of organizational effectiveness, OIPE is the central player in assessment and implementation of the USTF strategic plan. OIPE plays a vital role in providing relevant, pertinent and timely information for development and assessment of strategic and operational plans at units and the university levels.

2.11 OIPE in USTF Organization Chart
Fig. 2.1: University of Science and Technology of Fujairah Organization Chart.

The Office of Institutional Planning and Effectiveness reports directly to the Chancellor (Figure 2.1) to further empower this Office in accordance with USTF's focus on assessment, continuous improvement and international accreditations/rankings.

2.12 Organization Setup of OIPE

In achieving its mission statement and supporting goals and objectives, the Office of Institutional Planning and Effectiveness (OIPE) is structured around four highly coordinated activities; namely Institutional Research, Institutional Planning and Effectiveness, Accreditation and University Ranking, and Quality Assurance.

2.13 Responsibilities of the OIPE:

1. Predicting academic success and ensuring adequate support services for students.
2. Assessing the achievement of learning outcomes of all academic programs.
3. Assessing the achievement of the objectives of support and administrative units.
4. Evaluating students' overall satisfaction with their academic programs and administrative and support services provided to them.
5. Assessing alumni/graduate satisfaction with the education received at the University.
6. Using assessment results to improve the teaching and learning environment.

2.14 The Main Function of OIPE

1. Stand as a liaison between the University and the CAA on all academic and non-academic issues (CHEDS data).
2. Coordinate with colleges for the preparation of academic programs' self-study documents and site visits for the CAA's reviewing committees.
3. Monitor the performance of the university academic programs, support units and administrative departments to ensure the achievement of the specified goals, objectives and outcomes.
4. Organize workshops to enhance expertise in assessment and accreditation related tasks.
5. Assist in performing feedback surveys for academic and non-academic units of USTF.
6. Develop, implement and coordinate comprehensive plans for educational outcomes assessment.
7. Work with academic departments to develop and implement student learning assessment plans.
8. Explore and verify the suitability of the needs-assessment studies for new academic programs.
9. Create and maintain a database of institutional information.
10. Track student persistence, completions, and attrition trends.
11. Provide institutional research support for the university management.
12. Ensure that assessment results are used in subsequent planning activities.
13. Perform other duties such as providing data to management and colleges.

2.15 Institutional Research

To produce useful institutional information as an aid to the strategic and operational decision-making process, institutional research stands as the main integral part of OIPE activities. The institutional research activities are carried out regularly to meet the assessment cycle of the University. The activities could be summarized as the following:

1. To provide analytical and technical support to USTF management to support strategic planning and operational decision-making.
2. To produce the University Factbook, which is available for use by all members of the University community.

3. To provide data to the Center for Higher Education Data and Statistics (CHEDS).
4. To create and maintain databases of student enrolment, academic performance, retention, attrition, and graduation rates.
5. To produce Annual University Report.

2.16 Institutional Planning and Effectiveness (IPEM) Model

For continuous improvement in academic programs and supporting services, for effective allocation of budget and resources, and revision and refinements of strategic goals and mission, the following Institutional Planning and Effectiveness Model (IE Model) developed by OIPE and adopted by the University.

Fig. 2.2: Institutional Planning and Effectiveness (IPEM) Model.

2.17 Assessment Mechanism and Assessment Cycle of OIPE

University of Science and Technology of Fujairah (USTF) is committed to excellence and is fully engaged in on going quest for continuous assessment, critical evaluation and self-improvement of academic units, non-academic units and the University at large and OIPE is of no exception. The focal and central purpose of OIPE is to document quality and effectiveness by employing a comprehensive system of evaluation of all units, dissemination of evaluation results and following up corrective actions. To put into effect a comprehensive evaluation system, the OIPE is subject to equal assessment using different measurable factors such as feedback from top management, deans of colleges, program heads, faculty, CAA, international accreditation, international ranking and counterparts.

a) **Internal Assessment:**

Following organizational thinking approach of USTF, OIPE is subject to internal assessment by conducting Deans/ Heads of academic programs survey and top administration survey on annual basis. The survey rests around feedback on OIPE capability to provide professional support in preparing academic programs, effectiveness reports and accreditation documents as well as quality of reports on satisfaction of faculty, student and staff - (survey

questionnaires are provided in Appendices). Top management of the University evaluates the results of the survey as reported by OIPE along with the other reported feedback from college deans, non- academic units, and personnel.

OIPE is working with clear objectives, specified tasks and outcomes. The annual time action plan is subject to the approval of top management of the University. The time action plan provides a framework for timely, interim and annual evaluation of OIPE.

At organizational level, the Director of the OIPE is an officer guided by the mission, vision and goals of OIPE. The Director is to plan and coordinate university-wide assessment, evaluation and accreditation activities. The Director, who is also a member of the Council for Academic Affairs (CfAA), reports directly to the Chancellor.

All documents, policy manuals and reports must be subject to quality control and internal assessment system. All documents and reports produced by OIPE must pass through the office of the VCAA and the office of the Chancellor for the purpose of validation and verification before their submission to any organization, government agency, or any accreditation body within or outside UAE. The internal assessment of OIPE activities is an integral part of closing assessment loop.

b) External Assessment:

OIPE is in charge of conducting and analyzing different types of surveys, compilation of reports, publication and dissemination of policy documents and more importantly feedback from CAA and External Review Teams as well as professional staff involved in CHED's data analysis. Institutional cooperation with strategic stakeholders could be taken as one of the devices of external assessment.

USTF is embarking on internationalization as exemplified by international accreditation of its academic programs. OIPE is involved in providing data to international accreditation bodies. Thus, international accreditation feedback could be taken as an integral part of assessment.

The internal and external evaluation results will be used to improve and modify (if necessary) the University's effectiveness in implementing the institutional research planning and institutional effectiveness system.

2.18 Catalog Revision and Publication

Handbooks convey the university official statements of rules and regulations, and prior to be published they are reviewed periodically to ensure their validity and accuracy. The OIPE sends an email to each College/Office that contributed to the previous academic year catalogs to review their respective information and submit all additions or modifications that were approved. The OIPE edits the changes and forwards the catalogs to the Office of Marketing to be made available in both print and electronic formats on USTF Website to students, faculty and staff.

2.19 Institutional Effectiveness Committee

The Institutional Effectiveness Committee (IEC) is headed by the Chancellor and it has two co-chairs; the vice chancellor for academic affairs who is responsible for academic units and the vice chancellor for admistrative and financial affairs who is responsible for non-academic units. The IEC has a mandate to ensure institutional effectiveness and continuous quality improvement in all (academic and non-academic) areas, in accordance with local and international accreditation standards. The IEC members act as Institutional Effectiveness (IE) Coordinators in their respective colleges/units. A high-level Assessment Planning Committee (APC) comprises of the Chancellor and the two co-chairs of Institutional Effectiveness Committee (IEC). The APC is responsible for planning, directing, and monitoring the assessment and continuous improvement across all units in the University. The IE coordinator for each college is the head of College Effectiveness Committee (CEC) and shall provide support and guidance to all Assessment and Continuous Improvement Committees (ACICs) at the department levels. The roles and responsibilities of the two co-chairs of IEC as well as for Institutional Effectiveness Coordinators are given below.

Co-Chair for Academic Units

The Co-Chair of IEC for academic units shall provide leadership to establish a culture of assessment, quality assurance, and continuous improvement in all colleges of USTF. More precisely, the Co-Chair for academic units shall:

1. contribute, as member of the APC, to the overall planning of assessment and evaluation processes for academic units.
2. Provide guidance in revising, updating and enhancing the existing academic programs' effectiveness framework/model.
3. Work closely with IE Coordinators at college and program levels to ensure timely planning and implementation of all assessment processes and monitor the implementation of closing the loop and continuous improvement actions.
4. Conduct training and orientation sessions for IE Coordinators and faculty members.
5. Guide and assist IE Coordinators to implement the assessment of course/program learning outcomes (CLOs and PLOs), which includes:
   - Aligning mission statements, goals and learning outcomes of academic programs with USTF mission, vision, goals and objectives.
   - Ensuring that mission statements, goals and learning outcomes of academic programs are aligned with the CAA standards and the QFEmirates requirements.
   - Ensuring that mission statements, goals and learning outcomes (CLOs and PLOs) of the university academic programs comply with relevant international accreditation boards and organizations such as ABET and AACSB, as applicable.
   - Developing performance indicators (PIs) for each program learning outcomes (PLOs).
   - Developing mapping matrices for course learning outcomes to program learning outcomes (CLOs vs PLOs).
   - Developing assessment rubrics for the PIs of each program learning outcome.

- Establishing quantitative thresholds (expected performance targets) to assess the level of attainment of course/program learning outcomes.
- Developing a detailed description of how to use the assessment findings for program improvement (i.e. closing the loop to bridge the gap between expected performance and actual performance).
- Setting-up of monitoring procedures to ensure effective implantation of closing the loop actions.
- Benchmarking with peer programs locally and internationally.
- Reviewing annual assessment reports produced by academic units.
- Implementing the plans developed by the Assessment Planning Committee (APC) and approved by the IEC.
- Conducting any other tasks as deemed necessary by the OIPE for institutional planning and effectiveness.

Co-Chair for Non-Academic Units

The Co-Chair of IEC for non-academic units shall provide leadership to establish a culture of assessment, quality assurance, and continuous improvement in all non-academic units of USTF. More precisely, the Co-Chair for non-academic units shall:

1. Contribute to the overall planning of assessment and evaluation processes for non-academic units, as a member of the Assessment Planning Committee (APC).
2. Supervise the revision of goals and objectives of non-academic units ensuring that they are aligned with USTF strategic goals and objectives.
3. Ensure that objectives are measurable and relevant to the unit's activities.
4. Ensure that key performance indicators (KPIs) are appropriate to the objectives being measured.
5. Develop a framework for assessing objectives and how results are used for continuous improvements.
6. Ensure that non-academic units comply with CAA requirements.
7. Develop a manual for institutional Effectiveness of non-academic units.
8. Organize and conduct training workshops for non-academic units' personnel on assessment of objectives and methods of closing the loop.
9. Keep a sustained interaction with non-academic units regarding to their assessment operations and using results for improvements.
10. Review annual assessment reports produced by non-academic units.
11. Implement the plans developed by the Assessment Planning Committee (APC) and approved by the IEC.
12. Perform any other tasks as deemed necessary by the OIPE for institutional planning and effectiveness.

Institutional Effectiveness Coordinator for Academic Units

The IE Coordinator for Academic Units shall:

1. Master the assessment and evaluation processes, as explained by the Co-Chair for academic units, and train members of the CEC (College Effectiveness Committee) and ACICs (Assessment and Continuous Improvement Committees) in his/her college and departments to fully comprehend these processes.

2. Guide and assist members of CEC and ACICs to implement the assessment of course/program learning outcomes (CLOs and PLOs), which includes all required tasks specified by the Co-Chair for academic units.

3. Supervise the implementation of assessment and evaluation processes and review the progress reports.

4. Ensure that for each program complete documentation is available for assessment, evaluation, and continuous improvement. He/she shall also ensure the quality of documents.

5. Keep the Co-Chair for academic units informed about the progress for each program offered by the college.

6. Perform all assessment-related tasks as directed by the Co-Chair for academic units.

Institutional Effectiveness Coordinator for Non-Academic Units

The IE Coordinator for Non-Academic Units shall:

1. Master the assessment and evaluation processes, as explained by the Co-Chair for non-academic units, and train members of the assigned non-academic units to fully comprehend these processes.

2. Guide and assist members of the assigned non-academic units to implement the assessment of goals and objectives.

3. Supervise the implementation of assessment and evaluation processes and review the progress reports.

4. Ensure that complete documentation is available for assessment, evaluation, and continuous improvement of each assigned non-academic unit. He/she shall also ensure the quality of documents.

5. Keep the Co-Chair for non-academic units informed about the progress for each assigned unit.

6. Perform all assessment-related tasks as directed by the Co-Chair for non-academic units.

3 | Effectiveness of Academic Programs and Non-Academic Units

The mission and goals of academic and non-academic units are derived from USTF Vision, Mission, and Strategic Goals. Regular assessment and evaluation of all units are carried out using a variety of assessment tools. The effectiveness results contribute in defining remedial and improvement action. These actions result in further improvement of academic programs as well as administrative and support services. They also contribute to revising the Mission, Vision, and Goals of USTF, if so required. The flowchart depicting this process is shown below.
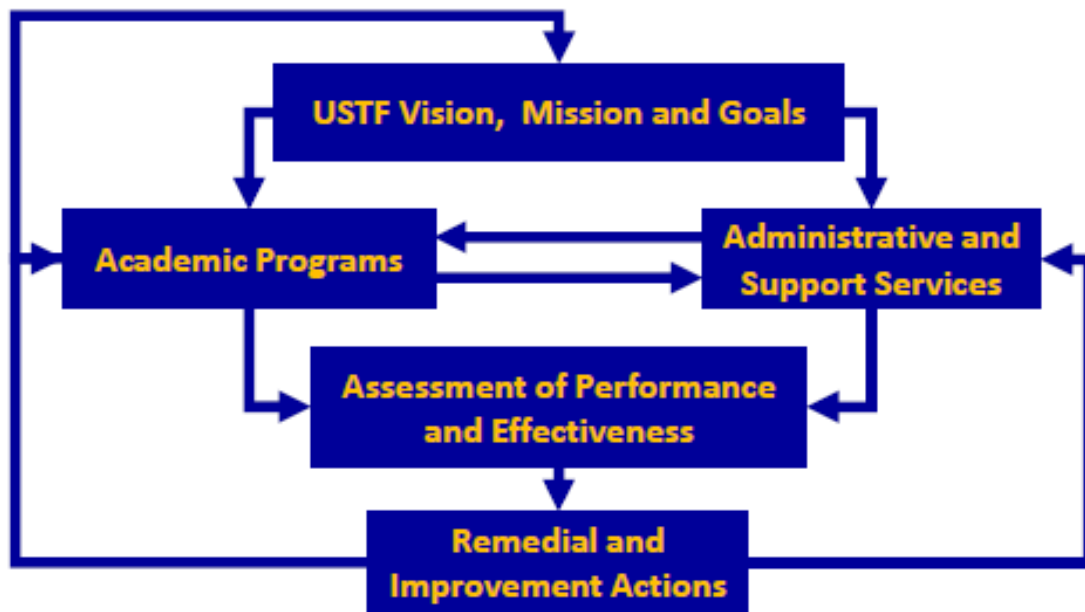

Fig. 3.1. USTF Institutional Effectiveness Flowchart

Institutional effectiveness in USTF is divided to two main assessment processes:
- Academic programs assessment process.
- Administrative and support non-academic units' assessment process.

Effectiveness Components for Academic Programs

1. Development of College mission and objectives aligned to University mission and objectives.
2. Development of Department/program mission and goals aligned to the College mission and objectives.
3. Development of academic programs learning outcomes (PLOs).
4. Ensuring that the PLOs are aligned to QF-Emirates Strands and consistent with CAA *Standards*.

5. Developing course learning outcomes and their mapping matrix to the program learning outcomes.

6. Selecting and designing assessment instruments for program goals, program learning outcomes and course leaning outcomes which include (a) Direct instruments, (b) Indirect instruments

7. Setting benchmarking criteria for the achievement of program goals, program learning outcomes and course outcomes.

8. Detailed assessment cycle.

9. Data analysis and assessment results.

10. Distribution of assessment results.

11. The process of reviewing assessment results and developing approved remedial and improvement actions as well as highlighting best practices to be adopted.

12. Setting a detailed plan for implementing improvement and remedial actions.

13. Monitoring the implementation of the actions.

4 | Development of Academic Programs Mission, Goals, Objectives and Learning Outcomes

The institutional effectiveness process requires the University to establish outcomes based on its mission. Faculty and administrators align the university mission statement to academic programs and administrative units' missions. Objectives and learning outcomes that are the most appropriate and meaningful are identified, assessed and reported to constituents. Continuous improvement is accomplished using assessment results for closing delivery gaps of learning and services. The following flowcharts show the sequence for developing missions, goals, objectives and learning outcomes:

Fig. 4.1. Flowchart for Developing Missions, Goals, Objectives and Learning Outcomes
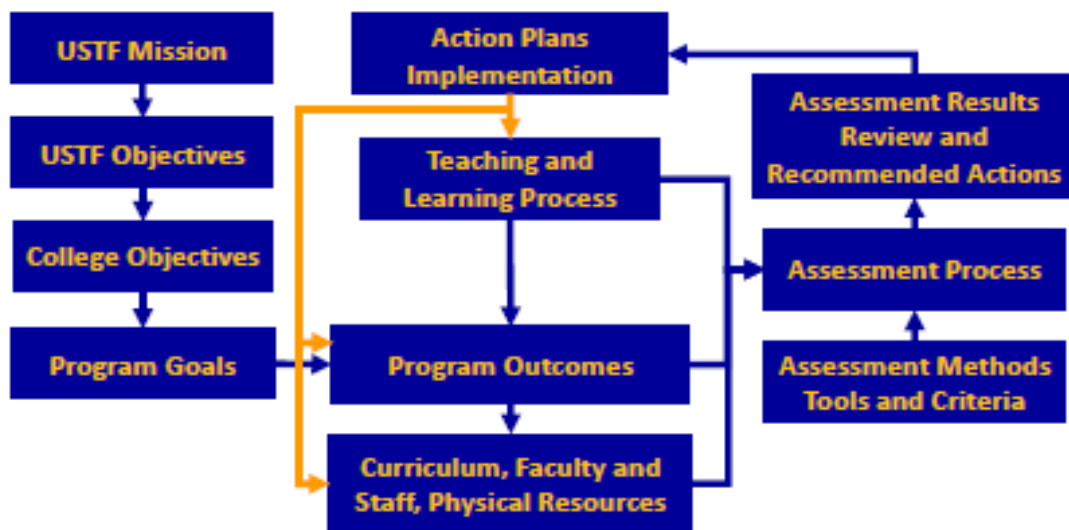

Short to medium term actions ➡️ Long term actions ➡️

Fig. 4.2. Academic Programs Assessment Flowchart

5 | Guidelines for Development of Missions, Objectives, Goals and Learning Outcomes for Academic Programs

5.1 Organization Chart

The organizational position of the academic unit/program must be clearly established and published. This organization chart illustrates the unit's governance, as established by the university leadership.

5.2 Academic Program/Department Mission

The program mission describes the primary function or activities of the program. It must be brief, memorable, distinctive and clearly indicates the purpose of the program and identifies stakeholders and supports the university mission.

5.3 Academic Program/Department Goals and Objective

Goals or objectives are related to the department/ academic program. They are statements that describe the professional skills and career accomplishments that the program graduates are expected to achieve. Goals/objectives assessment occurs few years after graduation in the workplace.

5.4 Academic Program Learning Outcomes

Program Learning Outcomes are statements that describe what students are expected to know and be able to do by the time of graduation. PLOs describe specific behaviors a student should demonstrate after completing the program. PLOs' focus is on the intended knowledge, skills, and competencies of the student after completion of the program. The learning outcomes are assessed as the student progresses in the program and immediately when he/she finishes the program. The following questions help in developing PLOs:

1. What should the student know? (cognitive)
2. What should the student be able to do? (psychomotor/behavior/ skills/competencies)
3. What should students care about? (ethics)

Common Learning Outcome Action Verbs: Analyze, Demonstrate, Prepare, Apply, Design, Rate, Compare, Develop, Revise, Compile, Discuss, Select, Compute, Evaluate, Use, Create, Explain, Utilize, Critique, Predict, Write

5.5 Course Learning Outcomes

Course learning outcomes are statements that describe what students are expected to know and be able to do upon finishing the course.

Table 5.1. Common learning outcome action verbs based on the Blooms taxonomy of the level of cognition.

Cognition	Meaning	Action Verbs
Knowledge	to recall or remember facts without necessarily understanding them	List, state, tabulate, write, recall, quote, label, outline, define, describe, draw, enumerate, present, recollect, show, tell, list
Comprehension	to understand and interpret what is learned	Associate, clarify, contrast, convert, defend, describe, differentiate, discuss, distinguish, estimate, explain, express, extend, extrapolate, generalize, give examples, illustrate, infer, interpret, paraphrase, predict, recognize, restate, rewrite, review, select, specify, summarize
Application	to put ideas and concepts to work in solving problems	Apply, calculate, compute, develop, employ, examine, experiment, find, manipulate, modify, organize, plot, prepare, sketch, use, solve
Analysis	to break information into its components to see interrelationships	Analyze, appraise, arrange, categorize, criticize, deduce, determine, draw conclusions, experiment, illustrate, investigate, relate, simplify, subdivide, separate, order
Synthesis	to use creativity to compose and design something original	Arrange, assemble, collect, compose, construct, create, design, formulate, generate, organize, plan, prepare, propose, set up, synthesize
Evaluation	to judge the value of information based on established criteria	Appraise, assess, defend, judge, predict, rate, support, evaluate, recommend, convince, conclude, compare, summarize, test, validate, verify
Affective Learning	What should the student care about	Appreciate, accept, acknowledge, attempt, cooperate, defend, dispute, join, judge, participate, question, share, initiate, listen, justify

5.6 Outcomes Performance Criteria (OPC) (Success Criteria)

OPC are specific and measurable statements identifying the minimum performance(s) required for the courses and program outcomes to be achieved or to meet.

5.7 Measuring Instruments/Indicators

5.7.1 Direct Assessment Instruments

1. Capstone Course Evaluation: Capstone course integrates knowledge, skills, and concepts associated with complete sequence of study for a given program. Such courses themselves become the instruments for assessing student learning and evaluation of students' work in terms of assessing student outcomes. In case capstone courses are not applicable, the department may select a group of core courses where competencies required for completing the program are measured. Capstone courses have the advantage that they assess student achievements in a variety of knowledge and skills-based areas by integrating their educational experiences. For students, these courses provide a forum to combine various aspects of their learning experiences. Capstone course evaluation, if done properly, is generally not associated with any weakness.

2. Course-Embedded Assessment: Course-embedded assessment refers to methods of using course goals, objectives and content to assess the extent of the student learning that is taking place within the classroom environment. It helps the instructors to obtain information about what and how students are learning within the program and classroom environment. This is achieved by either routinely collecting existing information through quizzes, test performance, essays, short answer performance, etc., or through assessment instruments introduced into a course specifically for the purpose of measuring student learning. Course-embedded assessment is relatively easy because it builds on the curricular structure of the course. By utilizing the data from existing assignments and course requirements, no additional time is required for collecting data.

3. Tests and Examinations: Tests and examinations are commonly used in assessing the body of knowledge associated with a program. They are useful in measuring whether students have acquired a certain process- and content-related knowledge. Furthermore, tests or examinations are traditionally given to students in large numbers and may not require faculty involvement when exams are taken by students.

4. Portfolio Evaluation: Portfolios are quite helpful in demonstrating student development and gradual progress providing valuable information about the learning process. A portfolio may encompass research papers, reports, tests and exams, case studies, presentations, design projects, and essays. They inspire students in improving the quality of their work and help the faculty in evaluating the progress of students in achieving the desired learning outcomes. On the other hand, portfolios demand cost, time, and effort on part of both faculty and students.

5. Pre-test/Post-test Evaluation: Pre-test/Post-test evaluations are helpful in determining student development and learning across pre-defined periods of time. These tests are generally undertaken at the start and end of a course or program. They can also be used to collect information on students upon their joining as well as when they exit a program or course. The results of such tests help in identifying areas of skill deficiency and to track improvement within the assigned time frame.

6. Graduation Project: A senior or graduate student thesis, research or design project that is organized by the department to provide students with the opportunity to demonstrate a broad range of skills and knowledge appropriate to the major is a very important assessment instrument. In many cases, a graduation project addresses most, if not all, of the program learning outcomes.

5.7.2 Indirect Assessment Instruments

1. Students' Survey and Exit Interviews: One of the important sources of indirect assessment is surveys taken by the graduating students in their last semester. In exit surveys, students are asked to respond to a series of questions or statements about their entire academic experience. Questions can be both open-ended and close-ended. When such surveys are coupled with exit interviews, it is possible to obtain students' feedback covering a broad range of issues related to the program of study, especially the strengths and weaknesses of the curriculum, teaching methodologies, lab facilities and services, etc.

2. Alumni Survey: Alumni survey, if designed properly, can provide valuable information about program satisfaction, students' career preparedness, knowledge and skills necessary for the job market. In such surveys, alumni can provide feedback on the currency of the program learning outcomes and how well they could achieve these outcomes.

3. Employer Survey: Employer surveys can provide information regarding the relevance of educational programs and what skills are required by graduates for the job market. Employers' feedback along with feedback obtained from alumni can noticeably contribute to making appropriate changes in the curriculum or program.

4. Internship Survey Form: For programs that require an internship, it is important to obtain feedback from internship supervisors of trainee students. This form contains questions about internship outcomes, which are directly related to some of the program learning outcomes.

Table 5.2 Time Plan for Implementing Direct and Indirect Assessment Tools for Academic Programs

No.	Assessment Type	Frequency	Assessment Instrument(s)	Responsibility
1	Course Learning Outcomes (CLOs)	Every Semester	Written Examinations, Lab or Clinical Examinations, Computer Simulations, Course Projects, Oral Presentations, Research Reports, Case Studies, Assignments, etc.	Institutional Effectiveness (IE) Coordinator
2	Program Learning Outcomes (PLOs)	Every Academic Year	Results of assessment of CLOs for selected courses or rubrics-based assessment of Performance Indicators (PIs)	Institutional Effectiveness (IE) Coordinator
3	Alumni Survey	Every Three Years	Alumni Survey Form	Institutional Effectiveness (IE) Coordinator
4	Employer Survey	Every Three Years	Employer Survey Form	Institutional Effectiveness (IE) Coordinator
5	Exit Survey	Every Academic Year	Exit Survey Form	Institutional Effectiveness (IE) Coordinator
6	Exit Interviews	Every Academic Year	Face-to-Face Meeting	Head of Department and IE Coordinator

Table 5.3 Timetable for Program Evaluation.

No.	Evaluation Type	Frequency	Responsibility
1	Program Effectiveness Report with Action Plan	Every Academic Year	Program Coordinator
2	Review and dissemination of assessment and evaluation results	Every Academic Year	OIPE
3	Regular monitoring of implantation of improvement plans	Ongoing	OIPE

6 | Roles and Responsibilities of Assessors

6.1 Faculty Members

Faculty members play an important role in the assessment process. They are responsible for assessment processes related to courses outcomes, which include the following:

- Course embedded assessment
- Projects and portfolios assessment
- Student feedback on the course
- Course evaluation by faculty members
- External training assessment

6.2 Heads of Departments

Heads of academic departments oversee, coordinate and monitor all the assessments at the program level. They are responsible for coordinating all assessments related to program goals and outcomes such as:

- Senior students' feedback
- Graduates' feedback
- Trainers' feedback
- Feedback from Advisory Boards
- Employers' feedback
- External evaluator's feedback
- Reviewing and approving program level effectiveness and assessment report.

6.3 Deans of Colleges

College Deans are responsible for:

- Monitoring and coordinating all assessment operations in all departments.
- Approving the assessment results and the required actions and resources.
- Communicating assessment results to the OIPE.

6.4 Institutional Effectiveness Committee

This is a central committee responsible for coordinating assessment plans and operations and setting policies, procedures and timelines for assessment of all entities and units in the University.

6.5 Office of Institutional Planning and Effectiveness

The office of institutional planning and effectiveness is responsible for:

- Monitors, coordinates and provides support for all assessment processes for academic and non-academic units.
- Analyses assessment data and reviews assessment reports.
- Prepares the University effectiveness report.
- Prepares the overall action plan based on recommendations from Colleges, administrative and support units.
- Communicates assessment results to the VCAA Office.
- Monitors the implementation of recommendations and remedial actions.
- Communicates actions taken as a result of the assessment to all stakeholders (CAA and USTF students).

6.6 Assessment and Continuous Improvement Committee (ACIC)

The ACIC for each academic department is responsible for carrying out the assessment, suggesting improvement actions, monitoring the implementation of suggested actions, and ensuring continuous improvement for each program offered by the department. The ACIC shall get its reports approved by the HOD and submit the approved reports to the College Effectiveness Committee (CEC).

6.7 College Effectiveness Committee

The CEC is a higher-level committee that will review the documents prepared by ACICs, write reports about the effectiveness of each program, and determine if the college goals are being achieved. The CEC shall submit its reports to the College Dean for review and approval. The approved reports shall be submitted to OIPE.

6.8 Vice Chancellor for Academic Affairs Office

The Vice Chancellor for Academic Affairs Office of is responsible for:

- Sets the required targets for Colleges, and academic departments based on the University strategic plan.
- Approves the final assessment and actions plans report submitted by the OIPE.
- Allocates the resources (financial, physical and human) required for implantation of the recommendations and remedial actions.

8.2 Assessment Instruments and Criteria for Successful Achievement

8.2.1 Course Outcomes Assessment

Select the instruments (direct and indirect assessment) that are used to collect data related to the course learning outcome assessment and decide criteria for successful achievement for each instrument. A criterion for overall achievement of the course learning outcomes must be decided based on the instrument results. These instruments may include but are not limited to the following:

Table 8.4. Course Outcomes Assessment

Code	Assessment Instruments	Criteria for Achievement
COI-1	Average marks of course students for CLOs	≥ 70%
COI-2	Feedback from the faculty; Achievement Rate	AR1 ≥ 70%
COI-3	Feedback from the course students; Achievement Rate	AR2 ≥ 70%

AR1 = percentage of course related program outcomes classified as 'achieved'.

AR2 = percentage of relevant responses classified as "achieved".

8.2.2 Assessment of Program Learning Outcomes

For each program, learning outcome direct and indirect instruments can be used. These instruments may include but not limited to the following:

Table 8.5. Program Outcomes Assessment

Code	Assessment Instruments	Criteria for Achievement
POI-1	Average marks corresponding to PLOs	≥ 70%

9 | Assessment Process for Academic Programs

The University has developed and implemented assessment strategies and processes to regularly assess and evaluate the Program Learning Outcomes (PLOs) of its academic programs. In this regard, relevant direct, indirect, quantitative and qualitative measures are taken for assessment, evaluation, and continuous improvement of academic programs. For the sake of enhancing the validity of the assessment process and to minimize any associated bias with any single assessment method, the triangulation concept is generally adopted. This means that at least three different methods (usually one direct and two indirect) are utilized for assessment of PLOs. In UAE, it is generally not possible for university graduates to appear in some nationally normed examinations and for that reason standardized examination results are usually not utilized for the purpose of direct assessment. Locally developed written examinations, oral exams, lab/clinic/studio exams, course projects, presentations and portfolios, etc. are used for the purpose of direct assessment while written surveys and questionnaires have been used to obtain relevant data from employers, alumni, external internship supervisors, faculty, senior students (exit-surveys) and Advisory Boards. The data acquired through the assessment process is evaluated to determine the extent to which the PLOs have been attained and what measures need to be taken for continuous improvement of the program.

For direct assessment, the extent to which PLOs have been achieved can be determined in at least two different ways. The first approach is based on determining the achievement of Course Learning Outcomes (CLOs) and utilizing these results to determine the extent to which PLOs have been achieved. This will be referred to as CLOs-based assessment.

The second approach is to represent each PLO in terms of a number of Performance Indicators (PIs), then assess the achievement of all PIs in accordance with well-defined rubrics and accordingly determine the attainment of PLOs. This approach will be referred to as the rubrics-based assessment. Both approaches have their own advantages as discussed below.

The course learning outcomes (CLOs) describe the abilities of students to be attained by the completion of a course. Accordingly, the course syllabus is developed, and teaching and assessment methodologies defined to ensure that the specified CLOs could be achieved by students at the completion of the course. It is the responsibility of the instructors to focus on the task of achieving the specified CLOs. Thus, even if the content of a course taught by different instructors may differ to a certain extent from one another, the goal of achieving all CLOs remains the same. Also, in CLOs-based assessment, marks for performance not related to student learning (such as attendance) do not affect the assessment as the marks used are not the overall course marks but they are based on marks obtained by students for specific course learning outcomes. Similarly, the question of difference in grades due to use of a curve or a fixed standard by different faculty teaching the same course does not arise since CLOs-based assessment is not dependent on overall grades of students in a course. There is still, however, a concern that different faculty may grade differently the students' response related to the same CLOs. But that concern is also applicable, to a certain extent, to rubrics-based assessment. And that's why inter-rater reliability is an important issue in rubrics-based assessment. Just like in rubrics-based assessment it is important to carry out rubric calibration and inter-rater reliability processes, effective CLOs-based assessment requires well-defined CLOs and a common policy on grading guidelines. Nevertheless, the rubrics-based assessment, that directly determines the extent to which program learning outcomes or their performance indicators have been attained, is associated with increased consistency of scoring, especially when multiple instructors are teaching the same course, as is often the case for basic courses offered by some programs.

Different departments and colleges can determine the preferred method for assessment of a program. However, it is important that for CLOs-based assessment, the CLOs of all courses must be carefully defined, and an appropriate mapping exists between CLOs and PLOs. Similarly, for rubrics-based assessment, the rubrics for PIs must be well-defined and appropriately calibrated. While rubrics-based assessment is more consistent in scoring and it does not require any mapping to determine the attainment of PLOs, CLOs-based assessment has the advantage that it also provides the instructors with useful feedback about students' learning and it can deliver valuable information about the strengths and weaknesses at the course-level. For this reason, CLOs-based assessment is mostly preferred at USTF and accordingly it will be discussed in more detail in this manual.

9.1 Direct Assessment

USTF considers assessment, evaluation, and continuous improvement of all its academic programs of significant importance. Before explaining the details of assessment process for assessment and evaluation of Program Learning Outcomes (PLOs), it will be helpful to describe in Section 9.1.1 the building blocks or essential elements of the implemented assessment and evaluation processes. This will be followed by detailed discussions on CLOs-based Assessment of Program Learning Outcomes in Sections 9.2.

Essential Elements of Assessment Processes

Levels of Learning: When discussing the attainment of PLOs, the objective is not simply their attainment but to ensure that PLOs have been attained to the required level of learning. For defining the levels of learning, USTF follows the national framework of qualifications established by the National Qualifications Authority (NQA) which has established clearly defined standards about the quality of qualifications and about what a learner is expected to achieve for each award. The framework has a structure of ten levels with each level based on specified standards of knowledge, skills and competence. These standards define the outcomes to be achieved by learners seeking to gain awards at each level. Levels are relevant to higher education provided by USTF. Each of these levels is defined by a set of learning outcomes which are categorized into three strands, knowledge, skills, and competence. Quality Framework Emirates (QFE) further divides competence into three sub-strands, autonomy and responsibility, self-development and role in context which make up the framework which program learning outcomes need to address. All programs offered by USTF are designed and delivered in a way that ensures that all strands in the QFE are properly addressed and the PLOs are aligned with QFE.

Formative and Summative Assessment: Formative Assessment, carried out during the initial years of a program, is to assess the ongoing performance activities and obtain feedback for improvement of relevant processes and teaching and learning methodologies. On the other hand, Summative Assessment is carried out at or near the conclusion of a program in order to determine the extent to which PLOs have been attained.

Performance Indicators (PIs): In assessing the PLOs using rubrics-based assessment, it is quite helpful if each PLO can be expressed in terms of some Performance Indicators (PIs). The PLOs are broadly stated and provide general information about the focus of student learning while the PIs are specific measurable performances that students shall demonstrate to indicate the attainment of a particular PLO.

Rubrics: Performance Indicators (PI) can be achieved at different levels of performance. Rubrics clearly define what is expected of students in order to achieve a level of performance. In other words, rubrics explicitly state the expectations for students' performance for each of the PIs for a given PLO. Well-defined rubrics provide a common and uniform platform to all faculty members to score students' performance. The analytic rubrics,

in which each PI is rated separately, may be defined as five-level rubrics with scores 1 to 5, as Poor, Developing, Satisfactory, Good, and Excellent.

9.2 CLOs-based Assessment of Program Learning Outcomes

Since majority of programs in USTF follow CLOs-based assessment at course and program levels, this will be discussed in more detail in the following.

Course Learning Outcomes (CLOs): All courses offered in an academic program at USTF have well-defined Course Learning Outcomes (CLOs) that describe the abilities of students to be attained at the completion of a course. For every course, the course syllabus is designed such that it takes into consideration all CLOs specified for that course. The Curriculum Committee and Assessment and Continuous Improvement Committee (ACIC) in a department are responsible for reviewing the CLOs of all courses and revising those as deemed necessary. The instructors are required to inform the students about CLOs in the beginning of the semester and to utilize appropriate teaching and learning methodologies that will contribute towards the attainment of CLOs by the end of the semester. Also, the CLOs are included in the course syllabus that is provided to students via Moodle (online learning platform at USTF).

Mapping of CLOs to PLOs: For an instructor responsible for teaching a course it is important to focus on CLOs of that particular course. These CLOs have been designed so as to correspond to some of the PLOs. That is, the ability represented by a CLO corresponds to ability represented by a program learning outcome. In other words, there is a mapping between the CLOs and PLOs. In every course syllabus the mapping between the stated CLOs and the PLOs of the program is clearly defined. One example from an EE course is given below to illustrate the CLOs of this course and their mapping to PLOs, which are named as A to L.

Course Learning Outcomes: At the completion of this course, students will be able to

1. Explain fundamental principles of communication theory.
2. Compare Amplitude, Frequency, and Phase Modulation and Demodulation techniques.
3. Analyze basic modulation and demodulation circuits used in AM and FM systems.
4. Explain principles and operation of digital communication systems.
5. Conduct experiments related to analog and digital modulation systems in both time and frequency domains.
6. Perform computer-based simulations of analog and digital communication systems.

Table 9.1. Mapping of Course Learning Outcomes to Program Learning Outcomes

CLO	1	2	3	4	5	6
PLO	L	L	A	L	B	K

Courses Considered for Assessment: USTF students continually acquire abilities, as prescribed by the specified learning outcomes, through various courses taken by them in accordance with their study plans. The CLOs-based assessment is carried out for all courses offered by a program for the course-level assessment with the objective of making

improvements in individual courses and their teaching and learning methodologies. However, for the purpose of program assessment, that is attainment of PLOs by the time of graduation, some junior and mostly senior year courses as well as Graduation (Capstone) Projects are primarily selected for CLOs-based assessment. Such an assessment will be considered as summative assessment.

Assessment Instruments: The concerned department specifies depending upon a particular program, a variety of assessment. These include Written Examinations, Lab or Clinical Examinations, Computer Simulations, Course Projects, Oral Presentations, Research Reports, Case Studies, Assignments, etc.

Achievement Criterion for CLOs-based Assessment at Course Level: The achievement criterion, satisfaction criterion, or expected level of attainment for each of the specified CLOs of a course on the basis of CLOs-based assessment can be defined in one of the following two ways, 1) the average marks of students for every CLO in a course are equal to or higher than a specified threshold (such as 70%), 2) a specified percentage of students (say 65%) shall attain the level of CLO abilities represented by another threshold (say 70% marks) or higher. If the Achievement Criterion is not met in a course, then it will trigger an alarm for the course coordinator/instructor and the issue will be discussed in the ACIC (Assessment and Continuous Improvement Committee) of the department to determine the reasons for not meeting the Achievement Criterion and possible corrective measures to be taken. The recommendations will be forwarded to the Department Council Meeting for discussion, approval, and implementation. A summary of the assessment results will also be provided to CEC (College Effectiveness Committee) of the college.

Achievement Criterion for CLOs-based Assessment at Program Level: The achievement criterion, satisfaction criterion, or expected level of attainment for each of the specified PLOs of an academic program on the basis of CLOs-based assessment can be defined in one of the following two ways, 1) the average marks of students for each PLO, as determined by the mapping process explained above, are equal to or higher than a specified threshold (such as 70%), 2) a specified percentage of students (say 65%) shall attain the level of PLO abilities represented by another threshold (say 70% marks) or higher. If the Achievement Criterion at program level is not met for one or more PLOs, then it will trigger an alarm for the ACIC (Assessment and Continuous Improvement Committee) of the department to determine the reasons for not meeting the Achievement Criterion and possible corrective measures to be taken. The recommendations will be forwarded to the Department Council Meeting for discussion, approval, and implementation. A summary of the assessment results will also be provided to CEC (College Effectiveness Committee) of the college. The Head of CEC shall submit the final report to the College Dean who will provide it to OIPE (Office of Institutional Planning and Effectiveness).

CAP Program: For analyzing the data obtained through the CLOs-based assessment process, a computer program named CAP (CLOs-based Assessment Program) was developed

by OIPE. For each course, the instructor will provide marks obtained by students for each CLO in that course. Multiple assessments of individual CLOs can also be incorporated. For course-level assessment, it shall determine the attainment of CLOs for individual courses and compare with the specified achievement criterion. Also, it has built-in mapping between the CLOs of courses and their corresponding PLOs. For program-level assessment, the program will analyze the data for the selected courses, as determined by the department, and determine the extent to which PLOs have been attained for a particular academic program.

As an example of course-level assessment using CAP program, consider the screenshot of data entry for a course as shown in Figure 9.1. This course has 6 course learning outcomes. A plot giving the percent of students obtaining 70% or higher marks for individual CLOs is shown in Figure 9.2 After determining the attainment of CLOs for individual courses, the CAP program was utilized to determine the attainment of PLOs for the specified mapping between CLOs and PLOs and this is shown in Figure 9.3. This process is applied to all academic programs that opt for CLOs-based assessment.

9.3 Indirect Assessment

For indirect assessment, variety of instruments are used to determine the attainment of PLOs of an academic program. These include feedback obtained from alumni, employers, senior students, and advisory boards, etc. Sample survey forms used for obtaining feedback from alumni, employers, and senior students for EE program are given in the Appendices. While the questionnaires may contain some additional questions, they must include at least one question concerning each PLO of the academic program under consideration.

10 | Assessment of Non-Academic (Administrative and Support) Units

10.1 Administrative and Support Units' Effectiveness Plan Components

The following are the main components of the assessment of Administrative and Support units:

- Development of the unit mission and objectives.
- Mapping the unit objectives with University objectives.
- Selecting the unit key performance indicators (KPIs).
- Selecting and designing instruments for performance measurement (direct and indirect).
- Setting detailed assessment cycle.
- collecting data, analysis, and compilation of assessment results.
- Distributing assessment results.
- Reviewing assessment results, developing approved remedial, and improvement actions.
- Setting a plan for implementing improvement and remedial actions.
- Monitoring the implementation of the actions.

10.2 Administrative and Support Units' Assessment Process

The Administrative and Support Units Assessment process is shown in the following:

Short to medium term actions ➡   Long term actions ➡

Fig. 10.1. Administrative and Support Units Assessment Flowchart

10.3 Administrative/ Support Unit's Mission

Administrative/ support unit's mission statement links the functions of the unit to mission of the University. The mission should indicate the primary function, core activities and the expected satisfaction by the stakeholders.

10.4 Administrative/ Support Unit's Objectives

The unit objectives should cover the following three aspects:
- Outcome statements.
- The level and efficiency of processes and activities.
- Satisfaction level expected from stakeholders.

10.5 Assessment Tools/Instruments and Criteria

Determine appropriate assessment measures and criteria. Common types of assessment are:

- Indirect: Measures level of satisfaction from those you serve (instruments used are feedback surveys).
- Direct: Measure of performance indicators and achievement of KPIs.
- External: Review and evaluation by top management and/or neutral party or auditors.

10.6 Criteria or Targets for Success

Always aim for a criterion level that stretches your unit's performance. For example: How well should we serve our clients? Examples:

- 95% of our users will be "very satisfied or satisfied" with our services/operations.
- At least 80 % of eligible employees will participate in training courses.
- 90% of the transcripts will be sent within three days.
- 98% of the forms will be processed without errors.

10.7 Assessment Process

A time plan should be set for conducting the various assessment activities. Some assessments may take place at the end of each semester, others annually. Determine the focus group of those you serve, survey people who have participated in your unit's activities, have an expert come through and review your processes.

11 | Assessment Process for Non-Academic Units

University of Science and Technology of Fujairah (USTF) engages all of its academic programs and non-academic units in the assessment process. In the previous chapter, the assessment and evaluation processes for academic programs were explained in detail. This chapter describes the assessment and evaluation processes carried out at USTF for all non-academic units that provide various types of support services to the academic programs and USTF students, faculty, and staff.

Assessment Cycle: Assessment shall be understood as a cycle. Assessment plans are developed at the start of the academic year with findings and analysis reported at the conclusion of the year. The assessment plan consists of steps 1 through step 4. The assessment report is the documentation of all steps of the assessment cycle. A template for creating an assessment plan and generating an assessment report are provided in Appendices.

Fig. 11.1 Non-Academic Units Assessment Cycle.

Step 1: Define the Mission Statement: All non-academic units shall have a unit-level mission statement that clearly defines the purpose of what the units does. The mission shall be a concise statement that aligns with USTF mission and known to the staff of the unit. A mission statement shall be rewritten when a unit determines a significant change in it based on continuous assessment and evaluation.

Step 2: Define the Goals: The unit formulates an adequate number of goals (3-5) to accomplish its mission statement. These goals shall align with USTF strategic goals.

Step 3: Define the Objectives: The unit develops a reasonable number of objectives per goal to realize and guide the attainment of each goal (2-3 objectives per goal is reasonable).

Step 4: Define Assessment Tools and Set Targets: A variety of assessment tools shall be used involving all stakeholders to determine whether the expected results have been achieved and provide evidence that the entity is accomplishing its objectives. The data obtained through these assessment tools shall yield quantitative results and determine the unit's performance with respect to the success criterion for the specified objectives.

For each objective, at least 1- 2 assessment instruments must be identified to gather the needed information, ideally one direct and one indirect.

Direct vs. Indirect Measures

There are two types of measures, direct and indirect.

Direct measures are more powerful because they provide data that correlate exactly with the objective. Direct measure explains what specific activity will be undertaken to show the extent to which an objective has been accomplished, and to provide information that may be used to make decisions for improvements in following years.

Each objective must have at least one direct measure associated with it, but multiple direct measures are often used to validate evidence.

Indirect measures are valid if paired with a direct measure, but they are weak in terms of evidence. Indirect measures ask for opinion or perception about an objective that is otherwise measurable. Student surveys, alumni surveys, and staff surveys are examples of indirect measures.

Measures may not tell why objectives are or are not being met. However, they shall be specific enough to answer whether or not the objective is being met. When the expected levels of achievement are not met, the measures shall help lead the entity to identify problem areas and decide on actions to improve the results.

Creating a Target or Defining a Success Criterion

Targets or success criteria have a single purpose, which is to define the level of accomplishment for the measure. Targets must always indicate what is expected to be achieved in an academic year.

Step 5: Conduct Assessments and Document Findings: At the end of the academic year, each unit must write an assessment report which consists of the findings, analysis, and action plan. The first step is to collect the findings (or results) associated with each measure. Findings are merely the quantifiable data, without any analysis, that result when the measures listed in the assessment plan are completed.

Results are reported in ways to draw conclusions about the degree to which the unit met desired expectations. This can be done by aggregating and summarizing assessment results in tables, charts, and narratives. For all assessments, include the sample size, date the data was collected, and the desired performance level. Only present summary data.

As with the targets, specific numbers are essential for findings. The actual percentage or numbers that resulted from the measures are the focus of findings.

Step 6: Analyze findings and Identify Action Plans for the Next Academic Year: After presenting the summary results for all assessments measuring a single goal, the unit describes analysis of the presented results. Analyze the data to determine if the objectives have been achieved and what actions need to be taken for continuous improvement.

Action Plan

An action plan is the follow-up to the assessment just conducted. Actions must be identified for each objective, even if that action is to replace the objective with another one. Actions should also be as specific as possible and should show that the team has thought through the results. Action plans also require identifying the team or person who will be responsible for execution of the plan and budgeting resources. In identifying your next actions, the entity is essentially designing the next assessment plan and thus closing the loop.

Step 7: Generate Assessment Report: The Assessment Report is the documentation of all the previous steps where the unit presents assessment results, goal by goal. The unit begins with a statement of the goal, the first objective, and then each measure, corresponding target, and result for each objective as described above. This is followed by an analysis of the goal. This process is repeated for each goal. Finally, decisions and action plan are formulated for the following year. A template for generating an assessment report is given in Appendix 2.

E. Comments on Study Plan/Courses

We would like to know how you feel about the study plan and courses offered in your area of specialization (Electronics/Communication/ICE).

F. Additional Comments

Please feel free to write your comments about any aspect(s) of the EE program. Your feedback will be of immense value in further improving the quality of the program.

SAMPLE ALUMNI SURVEY

Kindly tick the appropriate box for each statement. Please note that the assessment is based on a scale of 1 to 5, with 5 representing the highest level of satisfaction and 1 indicating the lowest level of satisfaction.

The last part of the survey form requires your comments about all aspects of the program. We expect you to take some time to provide us as much feedback as possible. Thanks!

SAMPLE EMPLOYERS' SURVEY

Dear Employer of USTF EE Graduate(s),

The purpose of this survey is to obtain your feedback about the competence of Electrical Engineering (EE) graduates from University of Science and Technology of Fujairah. Your feedback is very valuable to us, as it will enable us to further improve the quality of our graduates. We highly appreciate your time spent on completing this survey form and greatly acknowledge your contribution.

A. Engineering Education, Skills, and Competencies

Keeping in view the performance of EE graduates of USTF, kindly tick the appropriate box for each of the following abilities. In case you are not in a position to evaluate a particular attribute, please tick UTE (Unable to Evaluate) box.

1. Ability to apply knowledge of mathematics, science, and engineering:

   ☐ Excellent   ☐ V. Good   ☐ Good ☐ Fair   ☐ Poor   ☐ UTE

2. Ability to design and conduct experiments, as well as to analyze and interpret data:

   ☐ Excellent   ☐ V. Good   ☐ Good ☐ Fair   ☐ Poor   ☐ UTE

Quality Assurance Policy and Procedures

</div>

Policy Name	Quality Assurance Policy and Procedures		
Policy Owner	Supervisor of the OIPE	Reviewed	Annually
Approved By	Chancellor	Approval Date	

Policy

This policy explains the role of OIPE in achieving the university's mission and strategic goals.

Policy Statement

University of Science and Technology of Fujairah (USTF) is committed to excellence and is fully engaged in on going quest for continuous assessment, critical evaluation and self-improvement of academic units, non-academic units, and the University at large. The focal and central purpose of OIPE is to document quality and effectiveness by employing a comprehensive system of evaluation of all units, dissemination of evaluation results and following up corrective actions and continuous improvement plans.

Purpose of Policy

The purpose of the Quality Assurance Policy is to ensure the effectiveness and continuous improvement of all offered programs, academic and administrative support services at USTF. The successful implementation of this objective will significantly contribute towards the attainment of University's strategic goals and its mission.

Policy Details

To maintain and further improve its level of commitment to academic standards, quality assurance, and continuous enhancement, the University shall strive to achieve the following objectives:

- Improve the process of collecting, organizing, and disseminating institutional data to become the sole provider of reliable and authentic institutional data.
- Prepare effectiveness reports based on the analysis of institutional data and suggest actions to help achieve the strategic goals.
- Establish a culture of evidence-based assessment, evaluation, and continuous improvement for all academic and non-academic units in the University.
  - Actively promoting a culture of evidence-based assessment, evaluation, and continuous improvement for all academic and non-academic units in the University.
  - Enhancing the understanding and implementation of new processes and procedures developed for continuous quality improvement and closing the loop.
  - Extensively involving faculty, staff, students and other internal as well as external stakeholders in the quality assurance process.

     o Increasing student representation and involvement in the decision-making process related to matters concerning their academic programs, relevant support services, and student life.

- Revise and update thoroughly university documents to make them consistent and compliant with CAA Standards.
- Improve substantially the quality of documents prepared for initial accreditation and re-accreditation, as well as response reports submitted to the CAA.
- Organize assessment workshops for both academic and non-academic units to enhance the understanding of new processes for continuous quality improvement and closing the loop.
- Assist in improving the QS ranking of USTF.
- Make evidence-based recommendations to the university higher management, deans, and line managers for continuous quality enhancement.

Procedures

This policy shall apply to all academic areas and key administrative and support units of the University operations. USTF shall develop and utilize the necessary processes, templates/forms to regularly monitor, review and assess the effectiveness of all aspects of its operations and educational programs. The evidence-based outcomes of the quality assurance processes shall be used to make recommendations to college deans, office managers, and USTF's higher management for continuous improvement in the academic and administrative areas:

Assessment of Academic Programs

- Selecting and designing instruments for performance measurement (for direct and indirect assessment).
- Assessing the achievement of course learning outcomes (CLOs) for all offered courses in each semester.
- Assessing the achievement of program learning outcomes (PLOs) of all academic programs.
- Evaluating students' overall satisfaction with their academic programs, teaching, and administrative and support services provided to them
- Assessing alumni's satisfaction with the education received at the University
- Assessing students' participation and satisfaction with their activities
- Using assessment results to improve the teaching and learning environment at USTF.

Assessment of Administrative and Academic Support Units

- Revision/Development of the unit mission and objectives
- Mapping the unit objectives with university objectives
- Selecting the unit key performance indicators (KPIs)
- Selecting and designing instruments for performance measurement (direct and indirect)
- Setting detailed assessment cycle

- Collecting and analyzing data and compiling assessment results.
- Communicating of assessment results
- Reviewing assessment results and developing approved remedial and improvement actions
- Setting a plan for implementing improvement and remedial actions
- Monitoring the implementation of the actions

Support to Higher Management

- To provide analytical and technical assistance to USTF's higher management to support strategic planning and operational decision-making.
- To submit Effectiveness Reports that support higher management in the preparation of self-studies and development initiatives.

Office of Institutional Planning and Effectiveness

For effective implementation of its quality assurance policy, the University has established the Office of Institutional Planning and Effectiveness (OIPE), which is headed by a unit supervisor who reports directly to the Chancellor. The role and responsibility of OIPE are summarized below.

Role of OIPE

The Office of Institutional Planning and Effectiveness (OIPE) is entrusted with establishing a culture of evidence-based assessment, evaluation, and continuous improvement for all academic and non-academic units of the University. It shall collect, analyze, and disseminate authentic institutional data, and monitor the assessment and continuous improvement processes of all units of the University, and evaluate their outcomes, with the aim of achieving the strategic goals and the mission of the University.

The OIPE shall be responsible for:

- Ensuring effective implementation of University's quality assurance policy across all units
- Monitoring, coordinating, and providing support for all assessment processes for academic and non-academic units.
- Overseeing the functioning of all assessment related committees.
- Evaluating students' overall satisfaction with academic and administrative services
- Evaluating satisfaction of faculty and staff concerning matters of their interest
- Overseeing the outcome of alumni's satisfaction with the education received at the University
- Analyzing assessment data and reviewing assessment reports
- Preparing the annual effectiveness report based on effectiveness reports received from all academic and non-academic units
- Preparing assessment-based recommendations for colleges, administrative and support units
- Monitoring the implementation of recommendations and remedial actions.

Institutional Research

To produce useful institutional information as an aid to the strategic and operational decision-making process, institutional research stands as the main integral part of OIPE activities. The institutional research activities are carried out regularly to meet the assessment cycle of the University. The activities could be summarized as the following:

- To provide analytical and technical support to USTF management to support strategic planning and operational decision-making.
- To produce the University Fact Book, which is available for use by all members of the University community.
- To provide data to the Center for Higher Education Data and Statistics (CHEDS).
- To create and maintain databases of student enrolment, academic performance, retention, attrition, and graduation rates.
- To produce annual University report.

Institutional Planning and Effectiveness (IPEM) Model

Institutional Effectiveness is an ongoing process integrating assessment planning, systematic data gathering, analyzing, and interpreting the data to improve the quality of academic programs as well as to enhance the performance of various units and operations supporting the academic programs. To implement best academic practices the OIPE shall adopt a well-designed Institutional Effectiveness Model (IPE Model) which shall provide the institution with the capability to determine whether the objectives of its academic, student, and administrative service units, and the learning outcomes of its academic programs and courses, are being met. The IE model, as shown in Figure 2 below, shall be implemented across all units (academic and non-academic), and details of the main components of the assessment process are described in detail in the quality assurance manual.

Main components of the assessment process are as follows:

- Development of College mission and goals aligned to university mission and goals.
- Development of Department/program mission and goals aligned to the College mission and goals.
- Development of program learning outcomes (PLOs).
- Ensuring that the programs learning outcomes (PLOs) are aligned to UAE's QF-Emirates and consistent with the CAA standards.
- Developing course learning outcomes and their mapping matrix to the program learning outcomes.
- Selecting and designing assessment instruments for program learning outcomes and course leaning outcomes which include:
  o Direct assessment instruments
  o Indirect assessment instruments
- Setting benchmarking criteria for the achievement of program goals, program learning outcomes and course learning outcomes.

- Detailed assessment cycle.
- Data analysis and assessment results.
- Distribution of assessment results.
- The process of reviewing assessment results and developing remedial and improvement actions as well as highlighting best practices to be sustained or adopted.
- Setting a detailed plan for implementing improvement and remedial actions.
- Monitoring the implementation of the actions and closing the loop.

Policy Statement

USTF consistently applied assessment and evaluation of all academic and non-academic units and with close monitoring to the implementation of their improvement action plans to close the loop, leading to continuous quality improvement of academic programs as well as of administrative and support services to reach the aim of achieving the strategic goals and the mission of the University.

Purpose of Policy

The purpose of the Implementation and Monitoring of Improvement Plan Policy is to ensure the effectiveness and continuous improvement of all offered programs, academic and administrative support services through closing the loop of the assessment cycle by applying close monitoring to the implementation of improvement action plans.

Procedure

For effective implementation of its quality assurance policy, IEP Model shall be consistently applied for assessment and evaluation of all academic and non-academic units leading to continuous quality improvement of academic programs as well as of administrative and support services through closing the loop with the aim of achieving the strategic goals and the mission of the University. The flowchart depicting this process is shown below.

Assessment Process

The OIPE shall continually assess all programs and support services in accordance with the process described in the Quality Assurance Manual that provides tools and guidance to academic, administrative/supporting departments for developing and implementing their assessment plan for continuous improvement. The process is a requirement for all units and its implementation is monitored by OIPE with the support of various standing committees such as the Institutional Effectiveness Committee (IEC), the Continuous Improvement Committees (ACICs), and the College Effectiveness Committees (CECs). To assist the faculty and staff in properly carrying out the assessment process, OIPE organizes assessment workshops.

Assessment Outcomes

- The assessment procedures shall evaluate the extent to which the KPIs of units and PLOs of academic programs have been achieved.
- Based on the evaluation results, remedial and improvement actions for academic programs as well as administrative and student support services shall be identified.
- The loop shall be closed by assessing the impact of these remedial and improvement actions.

- The evaluation results help in improving the academic programs as well as the support services, effective allocation of budget and resources, revision/refinement of strategic goals and mission, and above all continuous improvement of programs and services.

USTF Institutional Effectiveness Flowchart

Assessment of improvement action Plan

- At the end of the cycle, each of the units are assessed based on the KPIs achieved, in-progress and not achieved.
- Every Unit is required to submit an "Action Plan" for unachieved and/or in-progress KPIs within a defined timeline.
- OIPE monitoring the implementation of the actions and closing the loop.
- OIPE shall submit Annual Effectiveness Reports to higher management.
